Sardar Said

Indianapolis, IN 46202 | 317-223-7604 | said13@purdue.edu | linkedin.com/in/sardarsaid

EDUCATION

Purdue University, Indianapolis Expected May 2029

Bachelor of Science Mechanical Engineering | GPA: 3.60/4.00

- Dean's List, Semester Honors (2025 – 2026)

TECHNICAL SKILLS

CAD & Design: SOLIDWORKS, Autodesk Fusion 360, AutoCAD, Parametric Modeling, Engineering Drawings
Programming & Data: Python, Pandas, NumPy, MATLAB
Engineering: Mechanical Design, CAD Assembly, Basic Thermodynamics, Engineering Mechanics
Languages: English (Native), Pashto (Professional), Russian (Professional), Spanish (Basic)

EXPERIENCE

DNV, Maritime and Renewable Energy Engineer (Intern) July 2024 – August 2024

- Organized engineering spreadsheets, technical drawings, and project documentation to make information easier for engineers to review and access.
- Assisted engineers with reviewing technical documentation and equipment specifications for maritime and renewable energy projects.

PROJECTS

V6 Engine CAD Assembly, SOLIDWORKS July 2026 – August 2026

- Modeled and assembled a V6 engine in SOLIDWORKS, including the engine block, crankshaft, six pistons, cylinder heads, valve train, timing components, and turbochargers.
- Created assembly mates and mechanical relationships to demonstrate coordinated crankshaft and piston movement.

Gear-Driven Robotic Gripper Assembly, Autodesk Fusion 360 May 2026 – June 2026

- Designed a multi-component robotic gripper in Fusion 360 using parametric modeling to control component geometry and assembly fit.
- Checked gear engagement, component clearances, and opening/closing motion to identify potential interference.

Vertically Integrated Projects: Land Speed EV Team, Purdue University January 2026 – May 2026

- Compared electric motor torque and power curves to help evaluate powertrain options for the Land Speed EV project.
- Worked on integrating a Tesla Large Drive Unit into a 4,500 lb vehicle chassis using 3D CAD models and mounting drawings.
- Collaborated with team members on gear ratio selection and drivetrain mounting requirements.

TECHNICAL WRITING

EV vs. ICE Efficiency and Cost Analysis, Medium May 2026 – June 2026

- Wrote an independent article comparing electric and combustion-engine vehicles using efficiency, operating cost, and infrastructure data.

CERTIFICATIONS

- HVAC: First Steps - Interplay Learning | July 2026
- Professional Certificate in Data Analysis with Python - IBM | July 2026
- Lean Production Fundamentals - Technical University of Munich (TUM)| June 2026
- Google AI Essentials - Google | June 2026
- AutoCAD Essentials Certificate - SourceCAD | June 2026

LEADERSHIP & INVOLVEMENT

Automotive Restoration Club, Member February 2026 – June 2026

- Perform hands-on teardown and structural maintenance on vintage internal combustion engines and drivetrains

Middle Eastern Engineering Society (MEES), Member September 2025 – May 2026

- Engaged in engineering professional development workshops and corporate networking events.
